Kofax Service Offerings
for Intelligent Automation

ORIENTATION & GETTING STARTED			ENABLEMENT & SUCCESS			REVIEW & SCALE	
Opportunity Identification	Initiation Workshop	Best Practice Design & Architecture Consultancy	2 week quick start	5 week enablement	12 week success	Solution Review	Technical Health Check

OBJECTIVE

Kofax Intelligent Automation Platform™ exploits artificial intelligence (AI), robotic process automation (RPA), mobile and other digital technologies to transform the capacity and performance of business operations, streamline processes and improve customer engagement.

Delivered in a single, flexible and open platform, the Kofax Intelligent Automation Platform includes capabilities for process orchestration, cognitive capture, robotic process automation, advanced analytics, mobility, communications management and electronic signatures.

Kofax Professional Services enables and supports our customers throughout the lifecycle of intelligent automation initiatives. Designed to help customers at each stage of their automation journey, Kofax's best practice programs help you start, build and scale.

Available program offerings include:

- Orientation & Getting Started
- Enablement & Success Programs
- Review & Scale

PROGRAMS AVAILABLE

ORIENTATION & GETTING STARTED

Programs available are:

- **Opportunity Identification:**
  Assistance to define and shape an intelligent automation strategy
- **Initiation Workshop:**
  Evaluate and approach initial intelligent automation use cases
- **Best Practice Design and Architecture Consultancy:**
  Best practice consultancy on initial architecture, design and implementation activities

ENABLEMENT & SUCCESS PROGRAMS

Programs available are:

- **Best Practice Design and Architecture Consultancy:**
  Provision of best practice consultancy on initial architecture, design and implementation activities

- **2-Week Quick Start Program:**
  Aids design phase and implementation of an initial intelligent automation use case over a 2-week period, helping customers gain quick hands-on experience with Kofax Platform implementations
- **5-Week Enablement Program:**
  Provides guidance on intelligent automation & RPA Concepts, evaluates first intelligent automation use cases and assists with initial design and implementation activities over a 5-week period to enable customers in initial intelligent automation implementations
- **12-Week Success Program:**
  Helps customers reach a point of self-sufficiency with intelligent automation implementations, provides intelligent automation & RPA training, assistance on identifying intelligent automation use cases along with assisting design and implementation activities over a 12-week period

REVIEW & SCALE PROGRAMS

Programs available are:

- **Solution Review:**
  Assessment of current intelligent automation deployment in terms of configuration and processes in order to maximize the use of technology and align with evolving business needs, identification of opportunities for overall solution improvements and efficiencies
- **Technical Health Check:**
  Investigation of current Kofax Platform infrastructure in order to ensure continued success and stability of your deployment along with advice on best practice administration, upgrade and maintenance activities
